## **Company Achieves Water Conservation and Efficiency in FY 2022-23**

In the fiscal year 2022-23, the company made significant strides in water conservation and efficiency. The implementation of sensor-based water taps and water-efficient operational controls across multiple facilities, including Noida Sector 126, Bangalore Jigani, Chennai SEZ, and others, resulted in a decrease in water usage from 37.4 ML in the previous year to 36.4 ML.

This achievement was made with a reduced investment of 0.25 crores, compared to 2.88 crores in FY 2021-22, demonstrating the company's commitment to cost-effective sustainability. The company's focus on water reuse, particularly in the Bangalore Jigani and Lucknow campuses, further underscores its dedication to environmental stewardship.

Overall, the company's efforts in water conservation and efficiency have not only reduced water usage but also showcased its commitment to sustainable practices and environmental responsibility. By implementing sensor-based water taps and water-efficient operational controls, the company has successfully decreased water consumption while minimizing costs. Additionally, the emphasis on water reuse in specific campuses highlights the company's dedication to maximizing resources and minimizing waste.
